EXPANDO TRAILER

Mobile Classroom

If recent budget cuts have School Districts struggling to find the funding needed for classroom space or upfitting classrooms with necessary equipment, then the ITB Expando Trailer may be a solution. The ITB Expando Trailer can be transported, transformed and become up to 850 square feet of fully customized usable class space that can serve the multiple locations of a School District with one trailer. Ideal for classes that allow for a rotating district schedule, such as many CTS classes, the Expando Trailer classroom only needs one full set of the requisite equipment for the entire district, and eliminates the need for dedicated brick and mortar classrooms for those programs at each location. This makes the Expando Trailer a source of significant savings and an innovative solution to maximize the reach of School Districts to the students in their communities.
