EXPANDO TRAILER

Concept

The ITB Expando trailer can be transported, transformed and become up to 850 square feet of fully customized usable space. With that much space in a mobile unit the possibilities are practically limitless. Ideal for mobile classrooms, training or event centers, retail/office spaces or marketing opportunities. We custom design and build every detail to suit almost any purpose. Since they are mobile centers, one trailer can be utilized in place of multiple brick and mortar buildings, which can save organizations significant cost at start-up and in on-going overhead. With the ITB Expando Trailer, the wow factor is simply undeniable.
